MARRIAGE. On the 3rd instant, at the Roman Catholic Cathedral, by the Right Roy. Bishop Raimondi, Thomas PANCIS-HUGHTS, Deputy Commissioner of Customs. Canton, to MARGARET ENGENCE, third daughter of the Hon. James Dever, of St. John, New Brunswick.

HONGKONA, FEBRUARY 4TE, 1385.

chronise it is curious to observe the varied fortnight ago it was resolved to send a telecomplications that arise. The Australiaus gram direct to his Majesty the King of Spain are undoubtedly wise in endeavouring to representing the injustics which they conprevent the establishment of other than Bri- ceive is being done to them. Into the questish "ule in Australiain, for they foresee the | tion of free trade, reciprocity, and protection possibility of friction which might have dis- we do not now propose to enter, nor yet into astrous results should a multiplicity of pow- the merits of the question as to the Cuban ers acquire interestathere. What they want | Treaty. We have mentioned the facts above fairly object to other powers annexing unoc- prepared to deny that Cuba would be a valulooking beneath the surface, however, a flaw | see it incorporated with them; but because is is soon discovered. The reply on behalf of belongs to another power objections are raisthe Australian colonies is that, whatever ed against freedom of commercial interdiverse governments may be established, course. The Australians may well object to commercially the various component parts having the seeds of similar difficulties scatfamily, notwithstanding different local trouble and discontent for succeeding geninterests and individual aspirations, and erations. that, this being so, they should remain a united family, abiding by the same laws ritory may be as yet unappropriated, the Australians have none the less an interest in it for the commercial movement which in the ordinary development of events will that territory its value, springs from the existing Australian colonies and not from the European countries which are casting covetous eyes on it. The colonies object, in fact, to outsiders having a finger in the family with them most entirely, and if occasion should arise would wish to see effect given to it locally. Should any foreign power for instance wish to seize the island of Chusan, England might fairly cry " hands off." The trade with China has been built up by British enterprise, British blood, and British treasure. Any attempt on the part of another power to seize an important point like Chugan, with the possibility of their andeavouring to use it to the detriment of British trade by imposing differential dues, etc., would therefore give England a right to step in and either take it for harself or prevent its acmanger policy, for wherever British rule is established there traders of all nationalities enjoy equal facilities. It is not so under the rule of other nations. France, it is true, made Saigon a free port, but she is falling away from the faith; already French shipping enjoys advantages there which are denied to that of other nations, and there is a loud clamour for the imposition of tradul regulations and customs dues which shall strike a blow at the trade in British manufactures in the Indo-Chinese Peninsula and South-western China. This affords a lesson which England would do well to lay to heart. The case of Cuba and the United States

which arises from crossing of commercial and Cuba belongs to Spain, but the Cubans themselves are not well satisfied with Spanish rule, and insurrections are almost chronic in touched was in 1877, namely, \$6.25. tion of the island, the commercial relations the United States are very close, and propositions have at times been made that the latter should acquire the territory altogether by purchase. Cuba and Porto Rico export \$100,000,000 worth cables of the company. The vessel was designed ing that it knew what was going on in the of products annually, of which the United States takes two-thirds, Great Britain taking a great part of the remaining third. The imports of Cuba and Porto Rico are \$17,000,000 from Spain, \$13,000,000 from Great Britain, and \$7,800,000 from other Spanish vessels are taxed 25 per cent, less or British versels. To place the trade on a will be engaged, the leads and jockeys for taking philosopher. Sir Isaac Newton, on his death- gether in the lowest portion of the deposit, shallow they would have to work round the rocks 31.90 per hundred.

affords an instance of the inconvenience

internal tax shall be levied on American products in Cuba and Porto Bico than on native products. The United States, on their part, are to remove the duty on augar imported that on tobacco. The treaty does not seem to have given general satisfaction by any are up in arms against it, as are also the planters in the south and west, who derive their greatest profit from sugar and tobacco, cotton alone excepted. Why the Americans should object to having facilities for buying their augur at a low rate given them appears rather puzzling from a free trade point of view, but the fact remains that they do. With reference to tobacco the case is somewhat different, as that is an article on which revenue may be raised perhaps more fairly than on any other with the exception of wines and spirits, being an acticle of luxury and not of necessity. It is to the change in the tariff on this article no doubt that the Alia alludes in the following extract in which it sums up the present

position of the treaty :- "President ARTHUR'S queer reciprocity treaty with Spain is doom It has few friends and a great many pessessed of at least one Government official who enemies. It does not please the main body makes the business of his office stand before all other considerations, and who even, upon occasion, Editor, not for publication, but as evidence of good of the protectionists, because it proposes to will sacrifice those holidays which Government admit a large quantity of foreign products servants are supposed above all others to enjoy. free, and it does not please the free-traders. Advertisements and Subscriptions which are not because it virtually abeliahes the part of the ordered for a fixed period will be continued until tariff that is most strictly a revenue duty and thereby postpones indefinitely the re- | day afternoon amasoments, and elects instead to duction of the rates on several thousand articles now protected." In the meantime terest. Here is a case which fully illustrates the the planters in the Philippines are entering cheerfulness with which he sacrifices his Satura vigorous protest against the treaty on the ground that the advantages conferred on Cuba in respect to the sugar trade will impose corresponding disadvantages in the Philippines, sinks they will be driven from of the case out of the hands of the prosecuting the United States market, their principal solicitor, and his examination of the witnesses one, by the duty free sugar from Cuba. With reference to tobacco they do not ap- The solicitor for the prosecution appeared to pear to concern themselves, probably because imagine that proceedings for the day had very little Philippine tobacco goes to the States. With reference to sugar, however, will it be convenient for your Worship to WHEN the commercial, geographical, and their feelings are very strong, and at a meetpolitical divisions of the world fail to syn- ing of the principal planters held at Iloito a not to pass unrecognised by the community at solicitors and the employes of the department.

is homogeneity instead of heterogeneity of given simply to show how diverse political government. Some English statesmen have interests may interfere with and disturb the advanced the theory that England cannot instural course of trade. No one would be large, and must be especially admired by the oupled territory. On the face of it this, able acquisition to the United States; the seems an almost unanswerable position. On Americans themselves would much like to of Australasia must ever remain one tered round about their shores to breed

Steam Navigation Company of the Hague and tons. This vessel is sister to the Bantam, and is Lister, and several ladies. 290 foot long by 37 feet boam and 25 feet doep She is the third of a new type of vessels which this company have ordered from Messrs. Inglis for the re-construction of their flest, with a view to meeting the altered conditions of trade in ly pie. In this sentiment we sympathice the Eastern Archipelago, and, consequently, of greatly increased carrying capacity.

Singapore appears to be taking a step in the direction of cremation, commencing with the bodies of animals. For some time past glanders and farcy have been prevalent among horses and poniss in that colony, and H. E. the Acting Governor has issued an order in Council for inspection of stables and for other measures to stampout the diseases in question. Mr. Batchelor, veterinary surgeon, who has been appointed an inspector under the order, has strongly impressed upon Government the necessity of burning the bodies of diseased animals of every kind whether horses, cattle, or dogs, as the only way of thoroughly destroying the geggs of disease He has accordingly been instructed to prepare phins of a cinerator, such as he approves, and to select suitable ground for the purpose of its erection. The cinerator proposed, is adapted for quisition by others. This is not a dag-in-the. the purpose of consuming not only dead animals but also the town refuse, the disposal of which has created much uneasiness.

Some interesting figures regarding the export trade of the Philippines are given in the Manila Comercio. The total quantity of hemp experted last year was 815,618 pionls, the largest quantity ever experted in one year except in 1881, when reached 868,904 piculs. In 1861 the quantity exported was only 336,022 piculs. The increase in the price of the article has been even more notable than that in the quantity. In 1861 the lowest price touched was 82.88 and the highest \$4.62, while last year the figures were 39 and \$10 respectively. The maximum and minimum rates of freight to England in the same years were in 1861, £5 and £3 10s, and in 1884, £3 and 7s. 6d. The trade in sugar has shown considerable fluctuations. In 1881 the quantity exported was 849,827 piculs; the next three years witnessedan increase of from two to four hundred thousand piculs, and the next two a decrease. From 1867 there was a tolerably steady increase until in 1883 the amount reached 3,403,499 piculs, political lines of demarcation. Politically but last year it fell back to 1,956,799 piouls. Last year also the prices were lower than they have ever been before, the maximum being \$4.55

On the 19th December a launch took place from the yard of Messrs. R. Napier and Sons. Govan, Glasgow, of a screw steamship for the Eastern Extension, Australasia, and China Telegraph Company. Mr. Dannys said that oncoluded his case. He Mr. Grossmann that the contract would not be carried out. He pointed out that

Mr. C. F. Grossmann, the defendant, was called and he gave evidence as to the making of the contract which was at nilar to that given by the plaintiff. Owing to the parties ordering not quired he did not state boxer cartridges in wiring home, and when he received a subsequent intimation that it was boxer cartridges which were required he agreed to it as he believed they were cheaper than the brass drawn cartridges. He telegraphed that home, and then his agent wired to him that the goods were not obtainable. He was therefore unable to carry out the contract, and he gave the plaintiffs intimation of it. He believed the custom in the trade with regard to these contracts was in accordance with Mr. Wotton's contention. Defendant said that at the time he put the word "boxer" into the con-

tract he told Tam Yu Tong that he was not sure he could get that particular kind of cartridge. Tam Yu Tong was re-called by His Lordship. and he denied that Mr. Grossmann had ever said anything of the kind to him. He alleged that all the way through he had told Mr. Grossmann that it was paper covered cartridges he wanted. He did not know that the kind was not stated on the contract, as he could not read English, until a friend told him so, when he at once went to the defendant and got him to add

the word boxer to the description of the cart-

Mr. Wotton again proceeded to contend that the plaintiff could not sue upon the contract now, as it was a condition that if the goods did not arrive within a cortain time the contract was null and void. The goods had not arrived at all. hands, and as an equivalent to that, on the other

His Lordship said the defendant had three

Mr. Wotton-No, my Lord, and after that the contract is stan and; it applies to both parties. His Lordship-No. unless there is something very different in the case to anything I have learned. His Lordship proceeded to express the view that the effect of this contract was that if the goods did not arrive within the stipulated time the plaintiffs could go into the market to. purchase, and the defendant could not afterwards subsequently arrived. Though Mr. Grossmann contract as broken, and should treat it as still existing, and give the defendant up to the

Mr. Wotton submitted there was no reason

His Lordship—The defendant has \$500 in his hands as bargain money; what had the other people got on their side in case of a fulura to supply Mr. Wotton-In case of such failure they would get their money back.

His Lordship-If the contract is to bear that construction. Mr. Grossmann would be able if there was a rise in the market price, to sell these Mr. Wotton said his client had pledged his deposit a certain sum of money to show his bond provision in the contract should apply equally to the both parties. Mr. Wotton cited the case of Boyd

son and Wellsby, page 600. He then went on to What he said really amounted to a condition His Lordship-So, because you fail in your contradicted Mr. Grossmann on that point, he thought the probabilities were in favour of his that he was entitled to costs in the second suit His Lordship-If you chose to make a breach in which the other side had paid the amount into Mr. Dennys contended that there was an

cartridge he would have stated it on the contract. Mr. Dennys said that was what they were This was the kind of cartridge that the Chinese suing for. They did their best to get the goods required, the other kind not being suitable to for boxer Snider cartridges, but a much larger one. With regard to Mr. Wotton's contention 21st August and the 8th November, the time the time the period for the fulfilment of the The plaintiff Ho Sai Wing was called, and contract expired. As to the costs in the second

EVENTS IN NORTH FORMOSA. arm y.

FROM OUR CORRESPONDENT.] Tamsui, 1st January.

A change in the weather, quite warm-again; Therm 64°. Everyone trying to look happy, but can't: We nover shall be happy again until our mails are delivered up to us. What a puny vered to a favoured few, the others not allowed foreigners. by the French to be delivered to their British owners. It often strikes one as curious that French ships (no declaration of war having been | round the compass during the formoon. Three made between France and China) are per ships outside. Several Wan Wanners going mitted to stop mails being delivered to British the rounds, must of them will me doubt be con- unknown, and the wildest gumours being in cir. is to the interest of France as opposed to China, moutrals residing in Formasa, a part of the tradicted to-morrow. empire of China, and that the same ships, if disabled or in want of stores or mails, &c., are permitted by international laws to make use of a British port like Hongkong. The courtesy shown by the English in Hongkong towards the French might, we think, be extended by the French towards the few British residents here in the matter of letters and stores. The French no doubt have a perfect right to prevent letters coming into the country, but why exercise the right against a few neutrals? Since the blockade was established, we suppose there never was more regular communication by junks between the mainland and Formoss. We understand that junks are continually bringing Chinese mails from the north and from the mainland Chinaso ports to the west of the island. Running the blockade seems to be an easy matter from all accounts, so that it would appear that the Chinese get their mails regularly by the old fashioned routs and foreign merchants who trust their mails to Government postal autho-

you never heard of him? He was once Prime Minister of England," "Wool!" replied the shepherd, "he seems to be a very respectable man!"- CHARLES MACKAY in the Gentleman's Magazine. TALES OF WHISTLER. Mr. Whistler's bon mots are circulating in society in a fashion calculated to make the bones of Sidney Smith turn in their grave. He has his admirers as we all know, in spite

of Mr. Ruskin; and one of these, wor-

shipping at his feet in the seathetic-Burne

Ionesattitude murmured, "Ah. Mr. Whistler

I only know of two painters in all the world -Velasquez and yourself." "Why," said Mr. Whistler, in the softest tones, "why drag in Velasquez?" This is one of the best of stories, but another of the same kind is worth repeating. "I see you everywhere in Nature," said one of his admirers; "in the sky, in the clouds, in the water. " "Yes," said the artist, with an air of inimitable self-complacency. "Nature is very apt. She shows a decided improvement since I took her up." -- Manchester

A REMARKABLE HEN. The following account of a rather remarkable ben is given by a correspondent of Land and Water: - She is a cross between a Game hen and a Brahms cock, and was Ratched in May, 1882. She commenced laying in January of the following year, and haid 189 eggs within the 12 months. This year she has laid 156 eggs, and is still laying. may add that she is quite a Cookney, baring lived on the leads of a public office for the last two years, her owner being the hall porter. She is very fond of lying before the fire. stretching herself like a dog. At meal times a chair is placed for her at the table, her food being washed down with a liberal supply of stout. Possibly it is the latter, combined with the warmth of her quarters, that has being alphabetical. caused her to lay so well. The most curious thing is that a great number of the eggs have been laid in the lap of the porter's re-engraved in a superior style and brought up | _ and OFFICE ROOM of No. 8, Queen's

At the last moment he came burrying into Madame's TREATHE WITH CHINA apartments and burst out with:

"Perfidicus woman! You promised not to further oppose me, yet you have deliberately attempted to prevent my going." "You mistake yourself," responded Bernbardt in sınaze,

"I mistake nothing," replied her busband warmly. "You know I dared not carry my gun uncovered through the atreets, and you have deliberately stolen my beautiful green cloth gun-case so as to keep me at home." "It is not true, not true," screamed the Madame hotly,

"I have the proof," yelled Mr. Bernhardt, dencing around in rage. "What have you "My new green cloth dress." "It is a lie," hissed the maddened husband.

"It is my gun-case."

EKRUPP'S ESTABLISHMENT

And so they parted .- The Philadelphia

AT ESSEN. The Brussels Repus Commerciale, Diplomatique et Consulaire, of October, 1040 1881 communicates the following details concern ing the daments works hir Eisen. The works are organised to perfection. Mr. Krupp true to the formula of economists, strives to utilise the elements of which he disposes without losing a particle of metal or one second of the labour of his workmen. Thus at Essen the steel cylinders removed by boring are subsequently bored themselves and serve to make cannon of a smaller bore, while everywhere else such cylinders are treated as refuse. Candons are not the only articles made at Essen; exletrees, iron wheels, and rails are likewise manufactured there. A few figures will testify better than any other commentary to the important reeults obtained by M. Krupp. In 1860 bis The Treaties between Greate Britain and in works gave employment to al.,764 worksnest; Corea, France and Annain, 1884 France and in 1870 to 7,084; at the present time 20,000 Cameddie, 1882, Great Britain and Sism, 1889, workings represent a population of 65,381 appeared in previous issues. The contract of the con souls, 13,000 of whom are children, who receive a good aducation in admirably managed schools! From these children the future it is published, or to the following Agentanworktoon, foremen, bookkeeplers, and even Macao Messre, A. A. de Mello & Co. engineers are recruited for the works. The Swarow Mesars. Quelch & Co. workmen's liquies erected by Mr. Krupp give Amoy Messrs. C. Gerard & Co. shelter to 19,000 persons ho lets them to his formosa. Messrs. C. Gerard & Co. workmen at a law rent. The Placen works in foodhow. Messrs. Hedge & Co. clude 11 high blast in rosces 1,542 ordinary furnaces, 439 boilers, 82; teppet bammers and 450 steam howines developing a total of 185,000 horselpower. Driving the previous year 250 million Rilgs, of steel were produced, the quantity of coal consumed smounting to 3,000 tons daily of the safety of the works is watched over by 63 firement many a provincial town does not possess one fourth the number. But the activity of this formidable company which supplies dannen to move than half of the actual armies is not limited to this. It Privatorica, Messra Maynard & Co. vermania works also 547 from mines in Germany and Coromeo in Spain, near Bilbaq; three coal mines in the suburbs of Becchung on the Rhine; it has Canaparistra Messis.
